# Look Vending

WNM 617 Final Project

Po Yuan Chen

Design Statement

This app Look Vending can track vending machines on the map. It allows users to add their discoveries on the map, or browse existing records. In each record, users can note the location information, products information, and retail price. The overall record through photos has achieved the purpose of simple use. The users can also briefly explain the main products, location detail through text description.

For people who like the feeling of interacting with a vending machine, who like the feeling of buying goods by clicking buttons, or for those who are looking for a quick drink. Look Vending is the app they need.
